# Facts on Cards

## Polar Bear

**Polars bears live in the frozen arctic. They hunt for fish in the ice. Their fur blends in with their surroundings.**

## White

**Animals that live in the snow often are the same color. This helps them hide from predators and prey.**

## Likes Cold

**Animals in the Arctic and Antarctic enjoy weather that is much colder than we like.**

## Eats Meat

**Some animals can only eat other animals.**

## Tiny

**Very small animals can get to very small food sources and can live in confined spaces.**

# Facts on Cards

## Polar Bear

Polars bears live in the frozen arctic. They hunt for fish in the ice. Their fur blends in with their surroundings.

**Polars bears live in the frozen arctic. They hunt for fish in the ice. Their fur blends in with their surroundings.**

## White

Animals that live in the arctic often are white. This helps them hide from predators.

## Likes Cold

Animals in the arctic and antarctic like cold weather. Many of these animals have thick fur or blubber to keep warm.

## Eats Meat

Some animals can only eat meat.

## Tiny

Very small animals can live in small spaces and are often found in confined areas.
